InterCloud Systems' Netlayer.io Software Platform Becomes a Computer Associates Technology Partner

SHREWSBURY, N.J., Dec. 29, 2017 (GLOBE NEWSWIRE) -- InterCloud Systems, Inc. (the "Company" or "InterCloud") (OTC:ICLD), a leading provider of cloud networking orchestration and automation solutions and services, today announced that its Netlayer.io software platform became a technology partner with Computer Associates (CA). Netlayer.io was recently selected by CA as a Technology Partner. The integrated solution was presented at CA World convention that took place in Las Vegas in November 2017.

Chief Technology Officer Konstantine Babenko stated, "We spent over a year working closely with teams at Computer Associates to integrate into several CA platforms including Spectrum and eHealth. The ultimate goal was to add value by providing an opportunity for customers to increase service level optimization to existing IT monitoring systems. It is our goal to continue to work closely with CA and drive more value to customers whose networks continue to move deeper into virtualized networking as part of their global networks."

Netlayer.io integrates with Computer Associates network monitoring and analytical systems. The integrated Netlayer.io/CA solution provides end-to-end orchestration and monitoring functions for next-gen virtualized networking environments such as SDN, NFV, and SD-WAN. CA monitoring and analytics through Netlayer.io's orchestration allows reactive and proactive actions based on CA's analytics input.

CA and Netlayer.io's combined solutions work in a fully virtualized, software defined environment, that allows networks to:

- Significantly increase availability of the network without extra hardware investment
- Decrease amount of service affecting failures as CA's predictive analytics functions through Netlayer.io's provisioning engine, to prevent faults from occurring
- Provide a higher level of networking resource load balancing based on CA's analytics input

Mark Munro, CEO of InterCloud Systems, stated, "The Netlayer.io team has done an outstanding job of building partnerships for the future success of the platform. The team is working on other technology partnerships as well to expand the reach of the platform and provide solid growth opportunities. We look forward to greater success with Netlayer.io in 2018."

About InterCloud Systems, Inc.

InterCloud Systems, Inc. is a leading provider of cloud networking orchestration and automation, for Software Defined Networking (SDN) and Network Function Virtualization (NFV) cloud environments to the telecommunications service provider (carrier) and corporate enterprise markets through cloud solutions and professional services. InterCloud's cloud solutions offer enterprise and service-provider customers the opportunity to adopt an operational expense model by outsourcing cloud deployment and management to InterCloud rather than the capital expense model that has dominated in recent decades in IT infrastructure management. Additional information regarding InterCloud may be found on InterCloud's website at www.intercloudsys.com.

Forward-looking statements:

The above news release contains forward-looking statements. The statements contained in this document that are not statements of historical fact, including but not limited to, statements identified by the use of terms such as "anticipate," "appear," "believe," "could," "estimate," "expect," "hope," "indicate," "intend," "likely," "may," "might," "plan," "potential," "project," "seek," "should," "will," "would," and other variations or negative expressions of these terms, including statements related to expected market trends and the Company's performance, are all "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and involve a number of risks and uncertainties. These statements are based on assumptions that management believes are reasonable based on currently available information, and include statements regarding the intent, belief or current expectations of the Company and its management. Prospective investors are cautioned that any such forward-looking statements are not guarantees of future performances, and are subject to a wide range of external factors, uncertainties, business risks, and other risks identified in filings made by the company with the Securities and Exchange Commission. Actual results may differ materially from those indicated by such forward-looking statements. The Company expressly disclaims any obligation or undertaking to update or revise any forward-looking statement contained herein to reflect any change in the company's expectations with regard thereto or any change in events, conditions or circumstances upon which any statement is based except as required by applicable law and regulations.
