SkyScale to Demonstrate World's Only Cloud-Based High Performance Rendering Platform with 16x NVIDIA V100 GPUs at SIGGRAPH

- Platform Delivers World's Fastest Final Frame Rendering Performance in the Cloud
- Highest Benchmark Results for RedShift and Octane on a Single Render Engine
- Low Cost Rendering – a Fraction of a Cent Per OctaneBench Hour

VANCOUVER, British Columbia, Aug. 14, 2018 (GLOBE NEWSWIRE) -- **SIGGRAPH Conference** – SkyScale, the leading provider of cloud-based dedicated multi-GPU servers and clusters, will showcase a live remote connection to its world's fastest rendering platforms at this week's SIGGRAPH 2018.

Remotely accessing one of its platforms equipped with 16 NVIDIA Tesla V100 GPUs, SkyScale will demonstrate leading benchmark performance using RedShift and Octane. The resulting rendering speed achieved is 80% higher than that delivered by any other cloud-based single platform (including AWS p3.16xlarge) resulting in low rendering cost at a fraction of a cent per OctaneBench Hour.

The demonstration will be held later today at [SIGGRAPH 2018](#), the world's leading annual interdisciplinary educational event for computer graphics and interactive techniques. The event is being held at the Vancouver Convention Centre in Vancouver, B.C., today through August 16. Tens of thousands of computer professionals are expected to attend.

SkyScale's performance, reliability and cloud systems providing the highest level of security are sought by power users across a wide range of industries, including oil and gas, automotive, research, defense, life science and media and entertainment to run large scale compute applications from machine learning to simulation, large scale visualization, big data analytics and final frame rendering.

SkyScale is the leading render cloud provider in price and performance, providing highly customizable solutions to fit each customer's specific requirements and work flow with high-touch personalized support. For virtual private cloud deployments, SkyScale seamlessly integrates flexible rendering capacity within a studio's existing rendering infrastructure.

Visitors at [SIGGRAPH Conference](#) can view demonstrations and speak with SkyScale representatives in booth #744.

About SkyScale

SkyScale is a world-class provider of cloud-based, ultra-fast multi-GPU platforms for HPC, rendering and the fastest deep learning performance available as a service anywhere in the world, and hosts cutting-edge and highly secure private clouds: all in industry-leading datacenters featuring unmatched reliability and physical and cyber security. Related services include solution consulting, simulation and tuning. SkyScale is an NVIDIA Authorized Cloud Service Provider, as well as a cloud partnership with One Stop Systems, Inc. (NASDAQ: OSS). For more information, visit www.SkyScale.com.

About One Stop Systems

One Stop Systems, Inc. (OSS) designs and manufactures high performance compute accelerators, flash storage arrays and customized servers for deep learning, AI, defense, finance and entertainment applications. OSS utilizes the power of PCI Express, the latest GPU accelerators and NVMe flash cards to build award-winning systems, including many industry firsts, for OEMs and government customers. The company's innovative hardware and Ion Accelerator Software offers exceptional performance and unparalleled scalability. OSS products are available directly, through global distributors, or via its SkyScale cloud services. For more information, go to www.onestopsystems.com.

Forward-Looking Statements

One Stop Systems cautions you that statements in this press release that are not a description of historical facts are

forward-looking statements. These statements are based on the company's current beliefs and expectations. These forward-looking statements include statements regarding the features and performance of SkyScale's cloud-based high-performance computing platform. The inclusion of forward-looking statements should not be regarded as a representation by One Stop Systems that any of our plans will be achieved. Actual results may differ from those set forth in this press release due to the risk and uncertainties inherent in our business, including, without limitation: risks associated with SkyScale's business operations; and other risks described in our prior press releases and in our filings with the Securities and Exchange Commission (SEC), including under the heading "Risk Factors" in our Annual Report on Form 10-K and any subsequent filings with the SEC. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof, and we undertake no obligation to revise or update this press release to reflect events or circumstances after the date hereof. All forward-looking statements are qualified in their entirety by this cautionary statement, which is made under the safe harbor provisions of the Private Securities Litigation Reform Act of 1995.
