Resonant to Host First Quarter 2018 Financial Results Conference Call on Wednesday, May 9th at 2:00 p.m. Pacific Daylight Time

GOLETA, CA -- (Marketwired) -- 04/30/18 -- Resonant, Inc. (NASDAQ: RESN), a leader in transforming the way radio frequency, or RF, front-ends, are being designed and delivered, today announced, it will release financial results for the first quarter ended March 31, 2018, after market close on Wednesday, May 9, 2018.

Management will host an investor conference call at 2:00 p.m. PDT (5:00 p.m. EDT) on May 9, 2018, to discuss Resonant's first quarter 2018 financial results, provide a corporate update, and conclude with a Q&A from participants. To participate, please use the following information:

Conference Call and Webcast

Date: Wednesday, May 9, 2018

Time: 2:00 p.m. Pacific daylight time (5:00 p.m. Eastern daylight time)

U.S. Dial-in: 1-877-451-6152

International Dial-in: 1-201-389-0879

Conference ID: 13678907

Webcast: <http://public.viavid.com/index.php?id=129350>

Please dial in at least 10 minutes before the start of the call to ensure timely participation.

A playback of the call will be available through June 9, 2018. To listen, call 1-844-512-2921 within the United States or 1-412-317-6671 when calling internationally. Please use the replay pin number 13678907. A webcast will also be available for 30 days on the IR section of the Resonant website or by clicking here: [RESN Q1 2018 Webcast](#).

About Resonant Inc.

Resonant (NASDAQ: RESN) is transforming the market for RF front-ends (RFFE) by disrupting the RFFE supply chain through the delivery of solutions that leverage our Infinite Synthesized Network (ISN) software tools platform, capitalize on the breadth of our IP portfolio, and are delivered through our services offerings. In a market that is critically constrained by limited designers, tools and capacity, Resonant addresses these critical problems by providing customers with ever increasing design efficiency, reduced time to market and lower unit costs. Customers leverage Resonant's disruptive capabilities to design cutting edge filters and modules, while capitalizing on the added stability of a diverse supply chain through Resonant's fabless ecosystem-the first of its kind. Working with Resonant, customers enhance the connectivity of current mobile devices, while

preparing for the demands of emerging 5G applications.

About Resonant's ISN® Technology

Resonant can create designs for difficult bands, modules and other complex RF Front End requirements that we believe have the potential to be manufactured for half the cost and developed in half the time of traditional approaches. ISN is a suite of proprietary mathematical methods, software design tools and network synthesis techniques that enable us to explore a much larger set of possible design solutions that regularly incorporate our proprietary technology. We then quickly deliver design simulations to our customers, which they manufacture or have manufactured by one of our foundry partners. These improved solutions still use Surface Acoustic Wave (SAW) or Temperature Compensated Surface Acoustic Wave (TC-SAW) manufacturing methods and perform as well as those using higher cost manufacturing methods such as Bulk Acoustic Wave (BAW). Resonant's method delivers excellent predictability, enabling achievement of the desired product performance in roughly half as many turns through the fab. In addition, because Resonant's models are fundamental, integration with its foundry and fab customers is seamless because its models speak the "fab language" of basic material properties and dimensions.
