## Management Commentary

"2016 was highlighted by our renewed focus to drive profitability, which led to our first year of GAAP net income since 2010," said Shane Evangelist, CEO of U.S. Auto Parts. "We also ended the year with no revolver debt for the first time since 2011. These accomplishments were driven by our emphasis on higher-margin private label sales, which continue to grow at a double-digit rate. In fact, the fourth quarter revenue mix of private label sales hit an all-time high at 68%. During the quarter, we also enacted a stock repurchase program, which we believe was a wise utilization of our cash flow.

"In 2017, we plan to continue executing on our profitability initiatives to remain revolver debt free. We also plan to continue growing private label sales by double-digits and generating strong free cash flow."

## Fourth Quarter 2016 Financial Results

Net sales in the fourth quarter of 2016 increased 5% to \$71.1 million compared to \$67.5 million in the year-ago quarter. The increase was largely driven by a 23% increase in online marketplace sales to \$19.5 million.

As a percentage of net sales, gross profit increased 50 basis points to 30.1% compared to 29.6%. The increase in gross profit margin was primarily driven by a higher mix of private label sales, which was 68% of net sales compared to 63% in the year-ago quarter. The increase was also driven by freight and warehouse supplies savings.

Total operating expenses in the fourth quarter increased 8% to \$21.3 million compared to \$19.7 million in the year-ago quarter. As a percentage of net sales, operating expenses increased to 29.9% compared to 29.2% in the year-ago quarter.

### **Non-GAAP Financial Measures**

Regulation G, and other provisions of the Securities Exchange Act of 1934, as amended, define and prescribe the conditions for use of certain non-GAAP financial information. We provide "Adjusted EBITDA," which is a non-GAAP financial measure. Adjusted EBITDA consists of net income before (a) interest expense, net; (b) income tax provision; (c) depreciation and amortization expense; (d) amortization of intangible assets; and (e) share-based compensation expense.

The Company believes that this non-GAAP financial measure provides important supplemental information to management and investors. This non-GAAP financial measures reflect an additional way of viewing aspects of the Company's operations that, when viewed with the GAAP results and the accompanying reconciliation to corresponding GAAP financial measures, provides a more complete understanding of factors and trends affecting the Company's business and results of operations.

Management uses Adjusted EBITDA as one measure of the Company's operating performance because it assists in comparing the Company's operating performance on a consistent basis by removing the impact of stock compensation expense, as well as items that are not expected to be recurring. Internally, this non-GAAP measure is also used by management for planning purposes, including the preparation of internal budgets; for allocating resources to enhance financial performance; and for evaluating the effectiveness of operational strategies. The Company also believes that analysts and investors use Adjusted EBITDA as a supplemental measure to evaluate the ongoing operations of companies in our industry.

This non-GAAP financial measure is used in addition to and in conjunction with results presented in accordance with GAAP and should not be relied upon to the exclusion of GAAP financial measures. Management strongly encourages investors to review the Company's consolidated financial statements in their entirety and to not rely on any single financial measure. Because non-GAAP financial measures are not standardized, it may not be possible to compare these financial measures with other companies' non-GAAP financial measures having the same or similar names. In addition, the Company expects to continue to incur expenses similar to the non-GAAP adjustments described above, and exclusion of these items from the Company's non-GAAP measures should not be construed as an inference that these costs are unusual, infrequent or non-recurring.
