\$8,100,000 PO: WindStream Technologies and Jamaica Public Service Company Expand Their Offerings for Renewable Energy

New Purchase Order Increases the Products and Services Now Available

NORTH VERNON, IN -- (Marketwired) -- 05/30/14 -- WindStream Technologies, Inc. (OTCQB: WSTI) and Jamaica's National Utility company, Jamaica Public Service Co. (JPS), have expanded their relationship with the execution of a new \$8,100,000 purchase order (PO) to coincide with the PO for \$14,500,000, signed earlier this year, which will provide additional products and services offered by WindStream Technologies to customers of JPS. This new PO will greatly enhance the suite of products offered under the original agreement to include additional energy storage, back-up emergency power and custom energy monitoring, data collection and system analysis. "This new agreement once again proves that JPS is a true thought leader in the Utility Power industry by enhancing the offerings available to their customers way beyond traditional generation," said Mr. Travis Campbell, COO of WindStream Technologies. "JPS is not only providing renewable energy products, but looking for ways to provide long term value to its customers," added Mr. Campbell.

Under the agreement, WindStream Technologies will be shipping its custom energy storage solutions to Jamaica, which will be distributed along with the Company's SolarMill® products. The SolarMill products are available to customers of JPS through their e-Stores. JPS will now have the ability to add to the product line with these advanced products and services. "All along, the goal of JPS was to provide a turnkey solution to our customers which would allow them to install a renewable energy platform that would provide clean renewable energy, save money and in the case of emergency, allow for their short term electrical needs," said Mr. Garth McKenzie, Director of Sales and Marketing.

"WindStream Technologies is committed to designing and manufacturing the best and most cost-effective energy solutions for both on and off-grid customers and the expanding relationship with JPS is another step forward in realizing the Company's goals," added Mr. Campbell.

The new products will be available for distribution in June 2014.

About WindStream Technologies Inc.

Headquartered in North Vernon, Indiana, WindStream Technologies is the leader in low-cost, hybrid, renewable energy solutions for urban, suburban and off-grid environments. Founded in July 2008, American owned and operated, WindStream Technologies has designed, tested, and now manufacturing its patented TurboMill® and SolarMill® distributed energy solutions, proving that homegrown innovation and manufacturing can thrive in today's economy.
