22nd Century Announces New Non-GMO, Very Low Nicotine Flue-Cured and Burley Tobacco Varieties

22nd Century strategically expands its proprietary lines of VLN™ tobaccos

WILLIAMSVILLE, N.Y.--(BUSINESS WIRE)-- 22nd Century Group, Inc. (NYSE American: XXII), a plant biotechnology company that is a leader in tobacco harm reduction and Very Low Nicotine tobacco, announced today that the Company has exclusively licensed from North Carolina State University (NCSU) several flue-cured and burley tobacco plant lines that grow with Very Low Nicotine levels. These new plants contain no foreign genetic material (non-GMO) and will compliment 22nd Century’s existing Very Low Nicotine plant technologies. The new, non-GMO, Very Low Nicotine tobacco plant lines are immediately commercially viable as they are the result of multiple generations of plantings that have yielded stable, true-breeding crop lines of Very Low Nicotine flue-cured and burley tobacco plants.

The addition of these non-GMO tobacco varieties represents a significant advancement for 22nd Century’s next generation tobacco technology. The Company’s new Very Low Nicotine plant varieties will provide options for 22nd Century and for potential licensees to more readily comply with the FDA’s plan to dramatically reduce the nicotine in all combustible cigarettes sold in the United States. The non-GMO nature of these tobacco varieties will also facilitate the sale of 22nd Century’s proprietary VLN™ tobacco in some foreign countries where the use of genetically modified crops is restricted.

“The results of this transaction with our research partner, NCSU, meaningfully enhances 22nd Century’s already impressive intellectual property portfolio. Importantly, our new plants and their genetics provide the Company with an excellent molecular background for improved taste characteristics and enhanced agronomic performance,” explained Dr. Juan Tamburrino, the Company’s Vice President of Research and Development.

“This exclusive NCSU license gives 22nd Century a substantial strategic and competitive advantage,” explained Henry Sicignano, III, President and Chief Executive Officer of 22nd Century Group. “Since approximately 90% of the tobacco in cigarettes is a mixture of flue-cured and burley varieties, we now have the ability to supply Very Low Nicotine tobacco blends to potential partners in the U.S. and around the world.”

About 22nd Century Group, Inc.

22nd Century is a plant biotechnology company focused on technology which allows it to increase or decrease the level of nicotine in tobacco plants and the level of cannabinoids in hemp/cannabis plants through genetic engineering and plant breeding. The Company’s primary mission in tobacco is to reduce the harm caused by smoking. The Company’s primary mission in hemp/cannabis is to develop proprietary hemp strains for important new medicines and agricultural crops.
